

QM-DA-8

1 to 8 QuickMedia® Distribution Amplifier

The QM-DA-8 is an 8-output QuickMedia distribution amplifier designed to distribute a single QM signal to up to 8 QuickMedia Receivers. All signal distribution is provided over inexpensive CAT5e type cable* via Crestron's exclusive QuickMedia transport, supporting high-resolution RGB, video, stereo audio and microphone signals up to a total of 450 feet end-to-end.

Up to two QuickMedia Distribution Amplifiers, Matrix Switchers, and Distribution Centers may be cascaded in a given QuickMedia signal path* to support versatile system configurations. For instance, a QM-DA-8 may be used to expand the output capacity of a **QM-MD4X2** to feed a single output signal to eight different displays.

Every QuickMedia port on the rear panel is accompanied by a Cresnet port with 24V DC power distribution built in to simplify termination of the QuickMedia and Cresnet wiring.

- > 1 to 8 QuickMedia signal distribution amp
- > Easy single-cable connections
- > No control or adjustments necessary
- > Single-space rack-mountable
